At Loftgarten, we exist to ideate, visualise, and create a new era of realities.

Our in-house team, led by contemporary designer and leader in spatial experience design, Paul Milinski. We work together to bring your project one step closer to reality by using creative direction, 3D architectural visualisations, and motion design. If you are looking for an elevated physical or digital experience, we specialise in leading the creative thinking behind your projects to craft awe-inspiring and uniquely desirable experiences.
